Application OSI Affiliate Membership

Dear Sir or Madam,

on behalf of the OpenProject Foundation (OPF), the non-profit governing body for the development and governance of the open source project management software OpenProject, I would like to apply for an OSI affiliate membership for OpenProject.

OpenProject is an open source project management software with a large, global user base. Licensed under the GPLv3, OpenProject was first released in 2012 and is used by many small, medium and large sized companies as well as individual users who are committed to open source. OpenProject aims to become the leading open source project management software and focuses in particular on great user experience and support for the entire project life cycle while using state-of-the art technology.

The Open Source Initiative (OSI) provides a strong platform aimed at promoting and strengthening open source software. We share this commitment and would be honored to join the OSI as an affiliate member.

Best regards,

[Signature]
